

## Converting a ULV LECO to a Barrier Sprayer

**Reasons for converting a Leco ULV to a Barrier Sprayer**

- \*Plant of EEE
- \*Restrictions of Child Protection Act (Notification for each Application)
- \*Longer Control of existing mosquito population
- \*Cover larger area (Leco vs. Backpack)
- \*Capable of covering multiple large areas in a shorter period of time

Vegetation after the application of FLEET 10 EC mixed 10:1 with water at an application speed of 2 - 5 miles per hour

Designed by William Mehaffey and Dennis Gallant  
 Northeast Mass Mosquito Control and Wetlands Management District  
 We gratefully acknowledge the help and technical expertise of George Wojcik:  
 City of Portsmouth Mosquito Control, Virginia  
 Thanks also to Sarah MacGregor and Dragon Mosquito Control  
 for the donation of the Leco Sprayer
