SELECT TCS
TICK
CONTROL
SYSTEM

Developing ticks feed on rodents and small mammals before they reach adulthood. The Select TCS Tick Control System treats rodents to kill ticks before they can spread disease. Select TCS Tick Control System can reduce tick populations by nearly 80% after just one year. Field trials show the total number of developing ticks can be reduced by 97% after two years.

Natular G will be listed in the OMRI Products List, available at the OMRI website **www.omri.org** and circulated to subscribing certifiers and state programs. This granular formulation joins the other Natular products (excluding DT) that have successfully completed the OMRI Product Review process, complying with the OMRI Policy and Standards manual and the requirements of the USDA National Organic Program Rule.

What this means is use of these Natular formulations in and around organic crop production will not endanger organic certification: Natular XRG (listed in 2011 as Natular G30), Natular T30, Natular XRT, Natular 2EC and Natular G

Natular formulations meet the criteria that make them an excellent choice for not only labeled environmentally-sensitive habitats but also for the growing number of communities with green or sustainable practice guidelines.

NMCA SCHOLARSHIP & AWARD INFORMATION

The NMCA Executive Board wants to remind everyone that it's never too early to begin thinking about the various scholarships, grants and awards that the NMCA offers to the membership each year:

- **The Bob Armstrong Award:** is given to a NMCA member for meritorious service to NMCA and mosquito control.
- **The McColgan Grant-in-Aid:** will go to an individual whose work is directly related to the advancement of operational mosquito control: for example, Surveillance technology, Spray technology, Biological control, Physical control, Data processing.
- **The Jobbins Scholarship:** The Jobbins Scholarship will go to a student whose work is in an area relevant to mosquito, biting fly control or other vectors in the Northeast related to disease transmission; for example, wetlands biology-ecology, entomology or vector parasitology. Studies may range in nature from purely ecological to strict vector control.
- **The Dave Scott Memorial Award:** This award is dedicated to the recognition of the fact that many advancements in our work come from the rank-and-file as a result of their time spent on the job, their experience and common sense. It may acknowledge an improvement in a procedure, a practice, any of the many operational strategies that we perform in mosquito control on a day-to-day basis.
- **The David H. Colburn Award:** This award is dedicated to David H. Colburn, charter member of NMCA, in recognition of his service to mosquito control and his perfect attendance for the first 50 NMCA Annual Meetings. NMCA members in good standing for at least 2 years and with 20 years consecutive or cumulative in mosquito control are eligible.

For more information on these awards, please contact the current NMCA President at president@nmca.org or check this link: <http://www.nmca.org/Scholarship.htm>
